

# SAVE THE DATE

**J**oin Clean & Prosperous for our **Study Mission 6.0: Building Bigger & Faster in Texas!** We'll be heading down south **Monday, May 11 through Friday, May 15, 2026**, with stops in Austin, Houston and more.

Through policy briefings, site visits, and stakeholder convenings across Austin and Houston / the Gulf Coast, participants will engage directly with clean energy advocates, regulators, project developers, and policymakers to learn how Texas is building clean energy faster and at scale - and what Washington can apply at home.

**Study Mission 6.0** is also about moving from ambition to effective implementation. We'll learn how clean energy projects move from proposals to production.

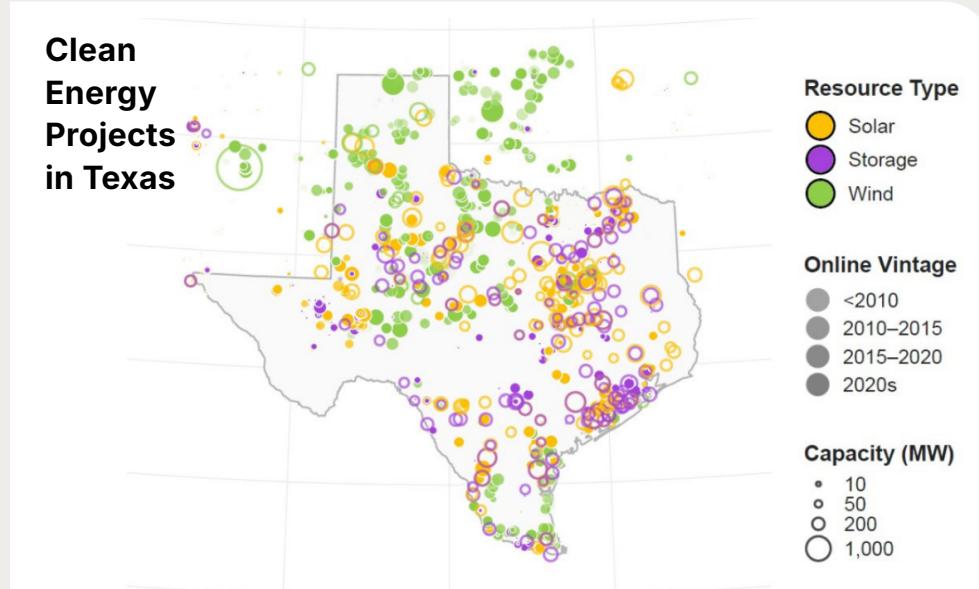

Chart by John Bistline (@JEBistline) with data from EIA-860 (updated October 2025)

# SPONSORSHIP OPPORTUNITIES

By sponsoring Study Mission 6.0: Building Bigger & Faster in Texas, you'll connect with and support Pacific Northwest leaders as they learn from nation-leading implementation, establish critical relationships, and bring back actionable insights to accelerate clean energy deployment at home.
